PAIN AND OPIOID NIH FUNDED RESEARCH STUDY

Multi- faceted persistent Opioid use Prevention Program (MOPP)

 **Brigham and Women's Hospital**
Founding Member, Mass General Brigham

<https://moppstudy.bwh.harvard.edu/>

PERSONALIZED APPROACH WITH PAIN APP

PURPOSE

In this research study we want to learn more about developing an effective strategy to prevent long-term opioid use and opioid use disorder after surgery. The goal of this research study is to pilot test the effectiveness and usability of a Multi-faceted persistent Opioid use Prevention Program (MOPP).

This pilot intervention program, funded by the National Institutes of Health (NIH) combines multiple strategies and is designed to support safer opioid prescribing, improve patient self-monitoring, improve communication with your doctors and ensure your pain is well-controlled while reducing overall opioid consumption.

HOW LONG WILL YOU BE IN THIS RESEARCH STUDY?

If you decide to join this research study, it will take about 6 months to complete the study with a total time commitment of about 5 hours.

ARE YOU ELIGIBLE?

If you are over 18 and undergoing orthopedic surgery you may qualify

WILL YOU BE PAID FOR TAKING PART?

\$50 gift certificate upon completion of the study
